Personal Statement

I am a 3rd year college student passionate about graphic design, UI/UX, and front-end development. I enjoy bridging the gap between aesthetic design and functional code, creating digital experiences that are both visually appealing and user-friendly. I am driven by the goal of creating technologies that address real-world problems through thoughtful design and continuous learning.

Education

Polytechnic University of the Philippines – Manila
Bachelor of Science in Information Technology
2024 – Present

Senior High School – Pasig City
STEM Strand
2023

Junior High School – Pasig City
General Weighted Average: 94
2021

Projects

AutoCare – Vulcanizing Shop Booking System

- Developed a booking system that allows customers to schedule tire repair and maintenance services online. The system features a user-friendly interface and tools for appointment management and service tracking to reduce waiting time.

EduRate – Student Faculty Evaluation System

- Created a web-based system that lets students efficiently evaluate faculty members. It ensures secure submission of evaluations and organized reporting for administrators, improving feedback collection and data management.

Studio T3CH – Block Section Website

- Developed a website for a block section to centralize announcements, resources, and updates. The site features responsive layouts and integrated sections for events, announcements, and shared learning materials.

MediCare – Barangay Health Center Management System

- Built a management system to help barangay health centers organize patient records and services. The system includes modules for registration, appointment scheduling, and medical record tracking to improve healthcare efficiency.

Certifications

Google Data Analytics (Professional Certificate)

- *Coursera – Google Career Certificates | Completed: December 13, 2024*
- Completed an 8-course comprehensive program covering data cleaning, preparation, analysis, and visualization using SQL, R, and Tableau.

Google Data Analytics Capstone

- *Google via Coursera*
- Practical application of data analytics skills to solve a real-world case study through data-driven decision-making.

Fundamentals of UI/UX Design

- *Microsoft via Coursera*
- Foundational principles of creating intuitive and visually appealing user interfaces and user experiences.

Developing Designs for User Experience

- *Technical Education and Skills Development Authority (TESDA) | Completed: July 30, 2024*
- Learned user experience design principles and practical techniques for creating intuitive digital interfaces.
